

I am concerned about FM translators being converted to LPFM. The point I have are:

1. I listen to Christian Music Station Air1 which serves my community by providing family friendly broadcasting and not junk.
2. If a station like Air 1 was do be replaced by other local programming, we do not know if it would be a typical un-family friendly type station. There are too many stations that cater to the perverted and profanity ridden type.
3. AIR1 is a service to my community because it provides a positive radio experience.
